

GET A BETTER GRIP ON CONTRACTOR SAFETY... WITH PLUGGRIP® AND SWITCHGRIP®

Introducing the Electrical Safety Tools No Contractor Should Be Without

For electrical contractors, nothing is more important than on-the-job safety. That's why we developed PlugGrip® and SwitchGrip®. Both of these unique safety tools provide a convenient, low-cost solution for increasing contractor safety, as well as speeding overall installation time

Compact and sturdy, these Safety Tools **are Personal Protective Equipment** designed to make it easy for electrical contractors to safely remove, disconnect, and replace electrical wiring devices during remodeling jobs:

- ▶ Both tools feature a visual power-warning alert that lights up when connected to a wiring device that is still hot, ensuring accident-free replacement of duplex receptacles and GFCIs and toggle switches. SwitchGrip's warning also includes an audible buzzer.
- ▶ Both tools have contoured plastic insulated handles that provide a secure, safe grip that helps to speed installations.
- ▶ PlugGrip makes wiring and installing outlets quicker and safer than ever, actually reducing wiring time by as much as **40%**!
- ▶ SwitchGrip's powerful magnet grips toggle switches during installation.
- ▶ SwitchGrip also features a built-in 12-14g wire stripper and bender.

Every electrical professional knows “Safety Is Job #1”
and OSHA safety rules now call for employers to provide every electrical worker with Personal Protective
Equipment! To order these “must-have” Contractor Safety Tools call **1-866-562-9363**
